Subject: three comments from SPMV manufacturer

Comment:

Dear Board,

We are a NHTSA-Approved Low Volume Manufacturer who is eager to work with CARB to create CARB-compliant SPMVs for manufacture and sale in the State of California and also for sale outside of California. We are ready to begin producing these vehicles in California immediately, as soon as we are approved by CARB. We will be working with many local businesses and suppliers and creating jobs in California.

In order for this to happen, we have two minor but crucial recommendations for the proposed regulations. The regulation's definition of SPMV should be identical to the definition of "replica" in the FAST Act. Also, the regulation should not require the SPMV manufacturer to be EPA certified if neither the FAST Act nor EPA have such a requirement.

We hope CARB will consider these minor but crucial changes to allow us to immediately start. If CARB accepts our proposed changes, we are prepared to spend over \$500,000 over the next 12 months starting immediately, all within the State of California to engineer and build the first run of these vehicles. We anticipate our investments and spending to manufacture, develop, test, and build these vehicles could easily top \$10 million dollars per year spent in the State of California alone starting in 2020.

Reach out with any questions or concerns.

Thank you.

Sincerely,

Jesse Glickenhau

Managing Director, Scuderia Cameron Glickenhau LLC
